

Disassembled press machinery, 8 units each 3,8 mt height and 35 tons, were shipped out from Bursa to Altamira Port of Mexico on flat rack containers together with accessories in open top containers last week. The some of over size and heavy units were transported to our fully equipped warehouse nearest port on low bed and shifted on flat racks for avoiding height clearance on route and delivered to port with other organized low beds.

The whole operation were completed within today's, loading at factory, transport to warehouse, shifting on flat rack, lashing & securing and re-delivery to Borusan Port within two days due to tight dead line for vessel of Maersk Line.

The shipment was consisting 8 units flat rack, 3x40 feet Open Top & 1x20 DC

The goods to be delivered to the client in Altamira Port of Mexico in 4 weeks as per schedule.
